# Infection Control & Prevention

Infection Control and Prevention is a major challenge for health care systems around the world and there is a significant opportunity to reduce avoidable morbidity and mortality through improvements. GDGH Infection Control and Prevention training provides basic information on the transmission of diseases, as well as how you can use precautions to prevent the spread of infection. The aim of the training is to build volunteers, to improve preparedness and response at all levels and to support health care workers, and others in the community.

**Target Audience** Healthcare Professionals
